ELSEVIER

Journal of Alloys and Compounds 293–295 (1999) 927–941

Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 293–295

AB_5
crystallographic study of $LaNi_{5-x}Sn_x$ ($0.2 \le x \le 0.5$) compounds and their hydrides 124
about the mechanism and the rate limiting step of the metalhydride electrode reaction 663
AB_5 alloy
influence of Ce and Nd contents of $Ml(NiCoMnAl)_5$ alloy on the performances of Ni–MH batteries 821
AB_2 alloys
performance of an AB_2 alloy in sealed Ni–MH batteries for electric vehicles: quantification of corrosion rate and consequences on the battery performance 770
AB_2 Laves phase
properties of $Zr_{0.5}Ti_{0.5}V_{0.75}Ni_{1.25}$ alloy ball-milled with nanocrystalline $LaNi_5$ powder 712
Absorption
evaluation of kinetics by utilizing the normalized pressure dependence method for the alloy $Ti_{0.95}Zr_{0.05}Mn_{1.48}V_{0.43}Fe_{0.08}Al_{0.01}$ 385
absorption of hydrogen isotopes by Pd–Pt alloys 900
AB_2 type alloy, P–c–T curves
dynamic P-c-T relations of the La-incorporated/fluorinated AB_2 hydriding alloys 391
AB_5 type alloy
studies on the electrochemical properties of $MlNi_{4.3-x}Co_xAl_{0.7}$ hydride alloy electrodes 648
AB_5-type hydrogen storage alloy
electrochemical properties of $Ml(NiCoMnCu)_5$ used as an alkaline fuel cell anode 833
AB_5 type hydrogen storage alloys
electrochemical performance of Sn-substituted, $LaNi_5$-based rapidly solidified alloys 724
AB_2-type Zr-based hydrogen storage alloys
influences of annealing heat treatment on phase structure and electrochemical properties of $Zr(MnVNi)_2$ hydrogen storage alloys 691
Activation
neutron diffraction study of the $LaNi_5$–D system during activation 118
a review on the development of AB_2-type Zr-based Laves phase hydrogen storage alloys for Ni–MH rechargeable batteries in the Korea Advanced Institute of Science and Technology 583
contribution of rare-earths to activation property of Zr-based hydride electrodes 632
improvement of the electrochemical properties of Zr-based AB_2 alloys by an advanced fluorination technique 702
effect of alakaline pretreatments (KOH, NaOH, LiOH) on electrochemical hydriding rate and work function of $LaNi_{2.5}Co_{2.5}$ 751
Activation process
a study of the main factors affecting Ni–MH battery activation 799
Aging
tritium aging effects in palladium on kieselguhr 62
Alkaline atom
effect of alakaline pretreatments (KOH, NaOH, LiOH) on electrochemical hydriding rate and work function of $LaNi_{2.5}Co_{2.5}$ 751
Alkaline fuel cell
electrochemical properties of $Ml(NiCoMnCu)_5$ used as an alkaline fuel cell anode 833
Alkaline treatment
effect of LiOH pretreatment on H_2 absorption kinetics of $LaNi_5$ 369
effect of advanced alkaline treatment on the electrochemical characteristics of hydrogen storage alloys 687
Alloy(s)
synthesis and properties of multicomponent hydrides with high density 421
a panoramic overview of hydrogen storage alloys from a gas reaction point of view 877
Alternating current impedance spectroscopy
effect of state of charge on impedance spectrum of sealed Ni–MH cells 788
Aluminum
calculation of the radial distribution function of bubbles in the aluminum hydrogen system 231
Amorphous
the intrinsic degradation behavior of $(V_{0.53}Ti_{0.47})_{0.925}Fe_{0.075}$ alloy during temperature-induced hydrogen absorption-desorption cycling 150
hydriding properties of the MgNi-based systems 437
hydrogen absorption properties of amorphous and crystalline alloys in the pseudobinary ZrCo–TiNi system 526
Mg_2Ni hydride electrodes prepared by sintering and subsequent ball milling with Ni powders 536
synthesis and hydriding/dehydriding properties of amorphous $Mg_2Ni_{1-y}M_y$ alloys mechanically alloyed from $Mg_2Ni_{0.9}M_{0.1}$ (M=none, Ni, Ca, La, Y, Al, Si, Cu and Mn) and Ni powder 541
electrochemical and structural characteristics of amorphous $MgNi_x$ ($x \ge 1$) alloys prepared by mechanical alloying 552
Amorphous alloys
absorption of hydrogen in Zr based amorphous alloys under high pressures of gaseous hydrogen 7
Anelasticity
dynamics of hydrogen in scandium and yttrium by acoustic spectroscopy 334
H and D tunnelling systems in diluted $Nb_{1-x}Zr_x$ alloys 338
local dynamics of H and D trapped by substitutional dopants in semiconductors 396
Anisotropy
effect of the disproportionation and recombination stages of the HDDR process on the inducement of anisotropy in Nd–Fe–B magnets 862
Annealing treatment
influences of annealing heat treatment on phase structure and electrochemical properties of $Zr(MnVNi)_2$ hydrogen storage alloys 691

Elsevier Science S.A.
PII: S0925-8388(99)00641-6

Applications
a panoramic overview of hydrogen storage alloys from a gas reaction point of view 877

Ball mill
hydrogen-absorbing magnesium composites prepared by mechanical grinding with graphite: effects of additives on composite structures and hydriding properties 564
Ball milling
catalysed reactive milling 400
structural study and hydrogen sorption kinetics of ball-milled magnesium hydride 495
Mg_2Ni hydride electrodes prepared by sintering and subsequent ball milling with Ni powders 536
Mg_2Ni-based hydrogen storage alloys for metal hydride electrodes 675
improvement of the electrochemical properties of Zr-based AB_2 alloys by an advanced fluorination technique 702
Ball-milling treatment
modification of a rapidly solidified hydrogen storage electrode alloy by ball-milling with Co_3Mo 670
$BaReH_9$
electronic structure of $BaReH_9$ 217
Battery
charge and discharge characteristics of sintered Mg_2Ni 626
Bonding characteristics
chemical structure and bonding characteristics of metal hydrogen systems studied by the surface analytical techniques SIMS and XPS 202
Born-Mayer interatomic potential
a Born-Mayer approach to the hydrogen potential in C-15 Laves phase compounds 300
Boron oxide
hydrogenation behaviour, neutron diffraction studies and microstructural characterisation of boron oxide-doped Zr–V alloys 93
Brite Euram project
development of fast kinetics metal hydride alloys and battery electrodes for high power applications 734

Calorimetry
calorimetric investigation of the hydrogen interaction with $ZrCrFe_{1.2}$ 34
CANDU
influence of neutron irradiation on H diffusion in Zr–2.5Nb alloy 324
solubility and partitioning of hydrogen in metastable Zr-based alloys used in the nuclear industry 893
$CaNi_5$
systematic B-metal substitution in $CaNi_5$ 185
transfer hydrogenation of olefin from alcohol using a hydrogen-absorbing alloy ($CaNi_5$) catalyst 919
Carbohydride
the structural peculiarities of the transition metals carbohydrides produced by combustion synthesis 452
Carbon
influence of carbon on electrode properties of V–Ti–Ni type hydrogen storage alloy 716
a panoramic overview of hydrogen storage alloys from a gas reaction point of view 877
Cast
comparison of the electrochemical properties of cast and melt-spun $MLNi_{4.3-x}Co_xMn_{0.4}Al_{0.3}$ (ML: La-rich Mischmetal) hydrogen-storage alloys 742
Catalysis
catalysed reactive milling 400
Catalyst
transfer hydrogenation of olefin from alcohol using a hydrogen-absorbing alloy ($CaNi_5$) catalyst 919
Catalytic transfer hydrogenation
transfer hydrogenation of olefin from alcohol using a hydrogen-absorbing alloy ($CaNi_5$) catalyst 919
Ce and Nd contents
influence of Ce and Nd contents of $Ml(NiCoMnAl)_5$ alloy on the performances of Ni–MH batteries 821
Cerium
the effect of O_2 preadsorption on the rate of H_2 absorption on the surface of rare earths (La, Ce, Tb, Dy) at 298 K 403
Cerium–nickel–silicon compounds
hydride formation in Ce(La)–Ni–Si ternary compounds 429
Charge–discharge characteristics
characteristics of Ni/MH power batteries and its application to electric vehicles 804
Chemical structure
chemical structure and bonding characteristics of metal hydrogen systems studied by the surface analytical techniques SIMS and XPS 202
Cluster
hydrogen sorption in elastically soft stabilized Pd-clusters 480
Cluster size
pd-cluster size effects of the hydrogen sorption properties 472
Co additive
effect of Co additives on the cycle life of Ni–MH batteries 829
Cobalt powder
effect of cobalt powder on the inner pressure of Ni/MH batteries 825
Combustion synthesis
the structural peculiarities of the transition metals carbohydrides produced by combustion synthesis 452
Complete crystallization method from amorphous solids
advanced nanocrystalline Zr-based AB_2 hydrogen storage electrode materials for NiMH EV batteries 508
Complex hydride
a panoramic overview of hydrogen storage alloys from a gas reaction point of view 877
Concentration of alkaline
influence of concentration of KOH solution containing 0.02 M borohydride on the kinetic properties of hydrogen storage alloys 680
Co/Pt
hydrogen ion implantation effect on the magnetic properties of metallic multilayered films 463
Corrosion
performance of an AB_2 alloy in sealed Ni–MH batteries for electric vehicles: quantification of corrosion rate and consequences on the battery performance 770
Crystal and magnetic structure
crystal and magnetic structure of TbNiAl-based deuterides, $TbNiAlD_{0.30}$ and $TbNiAlD_{1.04}$, studied by neutron diffraction and synchrotron radiation 178
Crystallinity
in situ study of hydriding–dehydriding properties in some Pd/Mg thin films with different degree of Mg crystallization 484
Crystal structure
hydrogen ordering and H-induced phase transformations in Zr-based intermetallic hydrides 74
hydride formation in Ce(La)–Ni–Si ternary compounds 429
CsCl-type crystal structure
electronic structure and hydriding property of titanium compounds with CsCl-type structure 213
Cycle life
charge and discharge characteristics of sintered Mg_2Ni 626

effects of pretreatments on the electrochemical properties of $MlNi_{4.0}Co_{0.8}Al_{0.4}$ alloy electrode and the performance of a Ni/Metal hydride battery 728
performance of an AB_2 alloy in sealed Ni–MH batteries for electric vehicles: quantification of corrosion rate and consequences on the battery performance 770
influence of Ce and Nd contents of $Ml(NiCoMnAl)_5$ alloy on the performances of Ni–MH batteries 821
effect of Co additives on the cycle life of Ni–MH batteries 829

Debye temperature
thermal and mechanical properties of zirconium hydride 23
isotope effects on the physicochemical properties of zirconium hydride 908
Decomposition
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 5: H capacity 57
Degradation
the intrinsic degradation behavior of $(V_{0.53}Ti_{0.47})_{0.925}Fe_{0.075}$ alloy during temperature-induced hydrogen absorption-desorption cycling 150
Degradation behavior
degradation behavior of foamed nickel positive electrodes of Ni–MH batteries 795
Degradation mechanism
degradation mechanism of the misch metal alloy hydride electrodes 737
Dehydrogenation
transfer hydrogenation of olefin from alcohol using a hydrogen-absorbing alloy ($CaNi_5$) catalyst 919
Desorption
protium diffusion in La–Ni alloys 270
evaluation of kinetics by utilizing the normalized pressure dependence method for the alloy $Ti_{0.95}Zr_{0.05}Mn_{1.48}V_{0.43}Fe_{0.09}Al_{0.01}$ 385
Desorption kinetics of H_2
hydrogen desorption kinetics of hydrides of $LaNi_{4.5}Al_{0.5}$, $LaNi_{4.5}Mn_{0.5}$ and $LaNi_{2.5}Co_{2.5}$ 407
Deuteride(s)
crystal and magnetic structure of TbNiAl-based deuterides, $TbNiAlD_{0.30}$ and $TbNiAlD_{1.04}$, studied by neutron diffraction and synchrotron radiation 178
magnetic properties of intermetallic compound hydrides and deuterides 243
Deuterium
influence of neutron irradiation on H diffusion in Zr–2.5Nb alloy 324
the use of small angle neutron scattering in the study of hydrogen trapping at defects in metals 346
Deuterium positions
neutron diffraction study of the new hexagonal laves phase $(Hf,Ti)(Ni,V)_2$ and its deuteride 169
Diffusion
muon–proton correlated diffusion in TiH_2 266
protium diffusion in La–Ni alloys 270
local and long-range hydrogen diffusion in $Nb(OH)_{0.013}$ 275
coherency stresses and deuterium diffusion in $NbD_{0.33}$ 289
muon diffusion in metallic hydride systems 292
Monte Carlo simulation of hydrogen diffusion in C15 Laves phase intermetallic compounds 296
influence of neutron irradiation on H diffusion in Zr–2.5Nb alloy 324
hydrogen permeation through magnesium 329
quasi-elastic neutron scattering study of the hydrogen diffusion in the C15 Laves structure, $TiCr_{1.8}$ 351
in situ monitoring of hydrogen absorption–desorption in Pd and $Pd_{77}Ag_{23}$ films by an electrochemical quartz crystal microbalance 468

Diffusion of H
hydrogen desorption kinetics of hydrides of $LaNi_{4.5}Al_{0.5}$, $LaNi_{4.5}Mn_{0.5}$ and $LaNi_{2.5}Co_{2.5}$ 407
Discharge capacity
electrochemical properties and characteristics of a fluorinated AB_2-alloy 593
influence of Ce and Nd contents of $Ml(NiCoMnAl)_5$ alloy on the performances of Ni–MH batteries 821
Discrete volume expansion
effect of substitution on hysteresis in some high-pressure AB_2 and AB_5 metal hydrides 67
Dislocation(s)
neutron diffraction study of the $LaNi_5$–D system during activation 118
the use of small angle neutron scattering in the study of hydrogen trapping at defects in metals 346
Disordered
a BPP model for nuclear spin relaxation in disordered metal–hydrogen systems 260
Disordered Mg_2NiH_4
structural studies of disordered Mg_2NiH_4 formed by mechanical grinding 146
Disproportionation
effect of the disproportionation and recombination stages of the HDDR process on the inducement of anisotropy in Nd–Fe–B magnets 862
Duplicated fluorination
a duplicated fluorination technique for hydrogen storage alloys 364
Dynamics, Fluorination treatment
dynamic P-c-T relations of the La-incorporated/fluorinated AB_2 hydriding alloys 391
Dysprosium
the effect of O_2 preadsorption on the rate of H_2 absorption on the surface of rare earths (La, Ce, Tb, Dy) at 298 K 403

EIS
contribution of rare-earths to activation property of Zr-based hydride electrodes 632
Elastic modulus
thermal and mechanical properties of zirconium hydride 23
isotope effects on the physicochemical properties of zirconium hydride 908
Electrical resistivity
migration of hydrogen in yttrium at low temperatures 341
Electric vehicle
characteristics of Ni/MH power batteries and its application to electric vehicles 804
Electrocatalytic activity
the effect of annealing on the discharge characteristics of $ZrV_{0.2}Mn_{0.8}Ni_{1.2}$ alloy 601
Electrochemical cell
hydrogen transport between proton conducting oxide and hydrogen storage metal 838
Electrochemical impedance spectroscopy
electrochemical impedance spectroscopy study of Ni/MH batteries 814
Electrochemical PCT
influence of carbon on electrode properties of V–Ti–Ni type hydrogen storage alloy 716
Electrochemical performance
improvement of the electrochemical properties of Zr-based AB_2 alloys by an advanced fluorination technique 702
Electrochemical properties
advanced nanocrystalline Zr-based AB_2 hydrogen storage electrode materials for NiMH EV batteries 508
studies on the electrochemical properties of $MlNi_{4.3-x}Co_xAl_{0.7}$ hydride alloy electrodes 648

Mg_2Ni-based hydrogen storage alloys for metal hydride electrodes 675
influence of concentration of KOH solution containing 0.02 M borohydride on the kinetic properties of hydrogen storage alloys 680
effects of the amount of Mg impurity on the electrochemical properties of $Ml(NiCoMnTi)_5$ hydrogen storage alloy 684
influences of annealing heat treatment on phase structure and electrochemical properties of $Zr(MnVNi)_2$ hydrogen storage alloys 691
hydrogen extraction by Laves phase alloys in an alkaline solution containing hydrazine 698
a study of the main factors affecting Ni–MH battery activation 799
electrochemical properties of $Ml(NiCoMnCu)_5$ used as an alkaline fuel cell anode 833
Electrochemical property
properties of $Zr_{0.5}Ti_{0.5}V_{0.75}Ni_{1.25}$ alloy ball-milled with nanocrystalline $LaNi_5$ powder 712
comparison of the electrochemical properties of cast and melt-spun $MLNi_{4.3-x}Co_xMn_{0.4}Al_{0.3}$ (ML: La-rich Mischmetal) hydrogen-storage alloys 742
Electrochemistry
about the mechanism and the rate limiting step of the metalhydride electrode reaction 663
Electrode composition
study of preparation technology for high performance AA size Ni–MH batteries 784
Electrode material
influence of cobalt content in $MmNi_{4.3-x}Mn_{0.3}Al_{0.4}Co_x$ alloy (x= 0.36 and 0.69) on its electrochemical behaviour studied by in situ neutron diffraction 637
Electrode(s)
systematic B-metal substitution in $CaNi_5$ 185
the improvement of the hydrogenation properties of nickel-metal hydride battery alloy by surface modification with platinum group metals (PGMs) 613
degradation mechanism of the misch metal alloy hydride electrodes 737
Electron-density distribution
the synthesis and magnetic properties of $LaCo_{13}$ hydrides and nitrides 247
Electronegative element
electrochemical properties of mechanically ground Mg_2Ni alloy 643
Electronic structure
electronic structure and stability of hydrides of intermetallic compounds 190
electronic structure and hydriding property of titanium compounds with CsCl-type structure 213
electronic structure of $BaReH_9$ 217
roles of the hydride forming and non-forming elements in hydrogen storage alloys 222
chemical bond state and hydride stability of hydrogen storage alloys 227
the influence of hydrogen on the magnetic properties and electronic structures of intermetallic compounds: YFe_2–D_2 system as an example 237
Electron-stimulated desorption
a new method for two-dimensional hydrogen analysis and its application to metal surfaces 361
Energy supply
recent developments in hydrogen storage applications based on metal hydrides 889
EQCM
in situ monitoring of hydrogen absorption–desorption in Pd and $Pd_{77}Ag_{23}$ films by an electrochemical quartz crystal microbalance 468
Equivalent circuit parameters
effect of state of charge on impedance spectrum of sealed Ni–MH cells 788
Eutectoid steel
nature of hydrogen trapping sites in steels induced by plastic deformation 310

Ferritic stainless steels
hydrogen surface effects in ferritic stainless steels 356
Ferritic steel
nature of hydrogen trapping sites in steels induced by plastic deformation 310
Ferromagnetism
magnetic properties of intermetallic compound hydrides and deuterides 243
Fluorination
improvement of activation stage of $MmNi_{4.7}Al_{0.3}$ hydride-forming alloys by surface fluorination 374
electrochemical Properties and Characteristics of the Fluorinated $Zr_{0.9}Ti_{0.1}V_{0.2}Mn_{0.6}Ni_{1.3}La_{0.05}$ electrode 707
Fluorination technique
electrochemical properties and characteristics of a fluorinated AB_2-alloy 593
Foamed nickel electrode
degradation behavior of foamed nickel positive electrodes of Ni–MH batteries 795
Fuel cell
recent developments in hydrogen storage applications based on metal hydrides 889

Ga-additive
Ga site occupancy in HDDR-treated $Nd_2Fe_{14}B$-based alloy by XAFS 872
Gradient magnetic fields
electromotive force of metal hydride electrodes in gradient magnetic fields 251
Grain boundary
a visible technology for display of hydrogen distribution in metals 317
Graphite carbon
hydrogen-absorbing magnesium composites prepared by mechanical grinding with graphite: effects of additives on composite structures and hydriding properties 564

H in metals
local and long-range hydrogen diffusion in $Nb(OH)_{0.011}$ 275
Hafnium
influence of interstitial oxygen on hydrogen solubility in metals 42
Hardness
thermal and mechanical properties of zirconium hydride 23
isotope effects on the physicochemical properties of zirconium hydride 908
HDDR
effect of the disproportionation and recombination stages of the HDDR process on the inducement of anisotropy in Nd–Fe–B magnets 862
phase transformation and magnetic properties of $Nd_8Fe_{84}Ti_8$ alloy during HDDR process 868
Ga site occupancy in HDDR-treated $Nd_2Fe_{14}B$-based alloy by XAFS 872
Heat capacity
thermal and mechanical properties of zirconium hydride 23
isotope effects on the physicochemical properties of zirconium hydride 908
Heat pump
a multi-hydride thermal wave device for simultaneous heating and cooling 915

Heat treatment
new V-based alloys with high protium absorption and desorption capacity 433
hydriding properties of the heat-treated MgNi alloys with nanostructural designed multiphase 546
electrochemical characteristics of nanocrystalline $ZrCr_2$ and Mg_2Ni type metal hydrides prepared by mechanical alloying 556
Hf based intermetallics
hydrogen absorption and desorption properties of Hf-based intermetallic compounds 417
High cooling rate
effect of rapid solidification process on the alloy structure and electrode performance of $Zr(Ni_{0.55}V_{0.1}Mn_{0.3}Cr_{0.55})_{2.1}$ 756
High hydrogen pressure
absorption of hydrogen in Zr based amorphous alloys under high pressures of gaseous hydrogen 7
High magnetic field
magnetic properties of intermetallic compound hydrides and deuterides 243
High pressure
high-pressure studies of Laves phase intermetallic hydrides–Adaptation of statistical thermodynamic models 14
pseudobinary intermetallic compounds in Hf_2M'–Hf_2M'' (M', M''= Mn, Fe, Ni, Cu) systems and their interaction with hydrogen at high pressures 426
High-pressure hydrides
effect of substitution on hysteresis in some high-pressure AB_2 and AB_5 metal hydrides 67
High rate
preparation and properties of no-binder electrode Ni/MH battery 780
Hot alkaline treatment
hot alkaline treatment on hydrogen storage alloys in sealed Ni/MH batteries 809
Hot-charging
a review on the development of AB_2-type Zr-based Laves phase hydrogen storage alloys for Ni–MH rechargeable batteries in the Korea Advanced Institute of Science and Technology 583
H tunnelling
dynamics of hydrogen in scandium and yttrium by acoustic spectroscopy 334
H and D tunnelling systems in diluted $Nb_{1-x}Zr_x$ alloys 338
local dynamics of H and D trapped by substitutional dopants in semiconductors 396
Hydride(s)
high-pressure studies of Laves phase intermetallic hydrides–Adaptation of statistical thermodynamic models 14
calorimetric investigation of the hydrogen interaction with $ZrCrFe_{1.2}$ 34
tritium aging effects in palladium on kieselguhr 62
hydrogen ordering and H-induced phase transformations in Zr-based intermetallic hydrides 74
structural studies of Laves phases $ZrCo(V_{1-x}Cr_x)$ with $0 \leq x \leq 1$ and their hydrides 88
crystallographic study of $LaNi_{5-x}Sn_x$ ($0.2 \leq x \leq 0.5$) compounds and their hydrides 124
systematic B-metal substitution in $CaNi_5$ 185
roles of the hydride forming and non-forming elements in hydrogen storage alloys 222
chemical bond state and hydride stability of hydrogen storage alloys 227
the influence of hydrogen on the magnetic properties and electronic structures of intermetallic compounds: YFe_2–D_2 system as an example 237
the synthesis and magnetic properties of $LaCo_{13}$ hydrides and nitrides 247
synthesis and properties of multicomponent hydrides with high density 421
hydride formation in Ce(La)–Ni–Si ternary compounds 429
charge and discharge characteristics of sintered Mg_2Ni 626
influence of cobalt content in $MmNi_{4.3-x}Mn_{0.3}Al_{0.4}Co_x$ alloy (x= 0.36 and 0.69) on its electrochemical behaviour studied by in situ neutron diffraction 637
tensile and impact properties of mesoscopic-grained α+β-type titanium alloys obtained through hydrogen treatments 858
a panoramic overview of hydrogen storage alloys from a gas reaction point of view 877
Hydride electrode
effect of rapid solidification process on the alloy structure and electrode performance of $Zr(Ni_{0.55}V_{0.1}Mn_{0.3}Cr_{0.55})_{2.1}$ 756
Hydriding and dehydriding rate
some microstructural aspects of hydriding internally oxidized Pd–Al alloys 306
Hydriding rate
effect of alakaline pretreatments (KOH, NaOH, LiOH) on electrochemical hydriding rate and work function of $LaNi_{2.5}Co_{2.5}$ 751
Hydrogen
hydrogen dissolution into zirconium oxide 38
a BPP model for nuclear spin relaxation in disordered metal–hydrogen systems 260
muon diffusion in metallic hydride systems 292
hydrogen permeation through magnesium 329
the use of small angle neutron scattering in the study of hydrogen trapping at defects in metals 346
quasi-elastic neutron scattering study of the hydrogen diffusion in the C15 Laves structure, $TiCr_{1.85}$ 351
hydrogen surface effects in ferritic stainless steels 356
a new method for two-dimensional hydrogen analysis and its application to metal surfaces 361
kinetics and morphology of the reverse β→α hydride transformation in thermodynamically open Pd–H system 379
catalysed reactive milling 400
hydriding properties of the MgNi-based systems 437
hydrogen-induced stress in Nb single layers 490
synthesis and hydriding/dehydriding properties of amorphous $Mg_2Ni_{1-y}M_{0.1}$ alloys mechanically alloyed from $Mg_2Ni_{0.9}M_{0.1}$ (M=none, Ni, Ca, La, Y, Al, Si, Cu and Mn) and Ni powder 541
tensile and impact properties of mesoscopic-grained α+β-type titanium alloys obtained through hydrogen treatments 858
solubility and partitioning of hydrogen in metastable Zr-based alloys used in the nuclear industry 893
absorption of hydrogen isotopes by Pd–Pt alloys 900
Hydrogen-absorbing alloy
transfer hydrogenation of olefin from alcohol using a hydrogen-absorbing alloy ($CaNi_5$) catalyst 919
Hydrogen absorption
absorption of hydrogen in Zr based amorphous alloys under high pressures of gaseous hydrogen 7
hydrogen absorption and desorption properties of Hf-based intermetallic compounds 417
hydrogen absorption properties of amorphous and crystalline alloys in the pseudobinary ZrCo–TiNi system 526
hydrogen-absorbing magnesium composites prepared by mechanical grinding with graphite: effects of additives on composite structures and hydriding properties 564
Hydrogen absorption and desorption
hydrogen absorption and desorption by Ti, Ti-5Cr and Ti-5Ni alloys 412
Hydrogen absorption/desorption
hydrogen in thin epitaxial Nb films 476
Hydrogen absorption–desorption properties
structural investigation and solid-H_2 reaction of Mg_2Ni rich nanocomposite materials elaborated by mechanical alloying 501

Hydrogen absorption kinetic
effect of LiOH pretreatment on H_2 absorption kinetics of $LaNi_5$ 369
Hydrogen absorption rate
improvement of hydrogen storage properties of melt-spun Mg–Ni–RE alloys by nanocrystallization 521
Hydrogenation
electrochemical characteristics of nanocrystalline $ZrCr_2$ and Mg_2Ni type metal hydrides prepared by mechanical alloying 556
tensile and impact properties of mesoscopic-grained α+β-type titanium alloys obtained through hydrogen treatments 858
Hydrogenation–Disproportionation–Desorption–Recombination
hydrogen ordering and H-induced phase transformations in Zr-based intermetallic hydrides 74
Hydrogen capacity
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 5: H capacity 57
Hydrogen charging
in situ measurement of lattice parameter change on Pd and Ni during cathodic hydrogen charging 174
Hydrogen diffusion
multi-layer problems in time-lag measurements applied on metal–hydrogen systems 282
Hydrogen diffusivity
determination of hydrogen diffusivity by subscale microhardness profiling 279
Hydrogen dissolution
hydrogen dissolution into zirconium oxide 38
Hydrogen distribution
a visible technology for display of hydrogen distribution in metals 317
Hydrogen-induced
hydrogen-induced rearrangements in Pd-rich alloys 161
Hydrogen-induced phase transformations
hydrogen treatment (processing) of materials: current status and prospects 844
Hydrogen in metals
coherency stresses and deuterium diffusion in $NbD_{0.33}$ 289
Hydrogen ion-implantation
hydrogen ion implantation effect on the magnetic properties of metallic multilayered films 463
Hydrogen loading
hydrogen sorption in elastically soft stabilized Pd-clusters 480
Hydrogen migration
migration of hydrogen in yttrium at low temperatures 341
Hydrogen motions
structural ordering and dynamics of $LaH_{3-\delta}$ 113
Hydrogen potential well
a Born-Mayer approach to the hydrogen potential in C-15 Laves phase compounds 300
Hydrogen pressure
effect of the disproportionation and recombination stages of the HDDR process on the inducement of anisotropy in Nd–Fe–B magnets 862
Hydrogen solubility
hydrogen solution in homogeneous Pd–Fe alloys 1
thermodynamic properties of hydrogen in fine Pd powders 19
influence of interstitial oxygen on hydrogen solubility in metals 42
study on the hydrogen solubility in UNiAl 52
enhancement of hydrogen solubility in α-iron by coherent precipitates 443
Hydrogen sorption
pd-cluster size effects of the hydrogen sorption properties 472
Hydrogen storage
systematic B-metal substitution in $CaNi_5$ 185
the effect of novel processing on hydrogen uptake in FeTi- and magnesium-based alloys 458
in situ study of hydriding–dehydriding properties in some Pd/Mg thin films with different degree of Mg crystallization 484
structural study and hydrogen sorption kinetics of ball-milled magnesium hydride 495
hydriding properties of the heat-treated MgNi alloys with nanostructural designed multiphase 546
recent developments in hydrogen storage applications based on metal hydrides 889
Hydrogen storage alloy(s)
two mathematical models for the hydrogen storage properties of AB_2 type alloys 10
TEM investigation of ZrO_2 in $Zr(Ni_{0.55}V_2Mn_{0.45-x})_2$ hydrogen storage alloys 101
roles of the hydride forming and non-forming elements in hydrogen storage alloys 222
new V-based alloys with high protium absorption and desorption capacity 433
microstructure and hydrogen absorption properties of nano-phase composite prepared by mechanical alloying of $MmNi_{5-x}(CoAlMn)_x$ and Mg 531
effects of cooling rate during casting on performance of metal hydride electrodes and nickel–metal hydride batteries 608
electrochemical characteristics of AB_5-type hydrogen storage alloys solidified at different cooling rates 621
electrochemical properties of mechanically ground Mg_2Ni alloy 643
effects of the amount of Mg impurity on the electrochemical properties of $Ml(NiCoMnTi)_5$ hydrogen storage alloy 684
effect of advanced alkaline treatment on the electrochemical characteristics of hydrogen storage alloys 687
influence of carbon on electrode properties of V–Ti–Ni type hydrogen storage alloy 716
effects of pretreatments on the electrochemical properties of $MlNi_{3.6}Co_{0.6}Al_{0.4}$ alloy electrode and the performance of a Ni/Metal hydride battery 728
comparison of the electrochemical properties of cast and melt-spun $MLNi_{4.3-x}Co_xMn_{0.4}Al_{0.3}$ (ML: La-rich Mischmetal) hydrogen-storage alloys 742
Hydrogen storage alloy electrode(s)
studies on the electrochemical properties of $MlNi_{4.3-x}Co_xAl_{0.7}$ hydride alloy electrodes 648
influence of concentration of KOH solution containing 0.02 M borohydride on the kinetic properties of hydrogen storage alloys 680
hydrogen extraction by Laves phase alloys in an alkaline solution containing hydrazine 698
Hydrogen storage electrodes
magnetic properties of commercial metal hydride battery materials 255
Hydrogen storage intermetallics
chemical structure and bonding characteristics of metal hydrogen systems studied by the surface analytical techniques SIMS and XPS 202
Hydrogen storage metal
hydrogen transport between proton conducting oxide and hydrogen storage metal 838
Hydrogen thermal desorption
nature of hydrogen trapping sites in steels induced by plastic deformation 310
Hydrogen trap
nature of hydrogen trapping sites in steels induced by plastic deformation 310
Hydrogen treatment of materials
hydrogen treatment (processing) of materials: current status and prospects 844
Hydrogen-vacancy complex
calculation of the radial distribution function of bubbles in the aluminum hydrogen system 231

Hysteresis
effect of substitution on hysteresis in some high-pressure AB_2 and AB_5 metal hydrides 67

Impedance
electrochemical properties and characteristics of a fluorinated AB_2-alloy 593
electrochemical Properties and Characteristics of the Fluorinated $Zr_{0.9}Ti_{0.1}V_{0.2}Mn_{0.6}Ni_{1.3}La_{0.05}$ electrode 707
μ^+ in metal hydrides
muon–proton correlated diffusion in TiH_x 266
Inner pressure
effect of cobalt powder on the inner pressure of Ni/MH batteries 825
In situ measurement
in situ measurement of lattice parameter change on Pd and Ni during cathodic hydrogen charging 174
In-situ spectroscopic characterization
in-situ and ex-situ characterization of surface oxide films on AB_5-type metal hydride electrodes 747
Interaction of hydrogen with Li
effect of the penetration of Li atoms into the Pd surface on thermodynamic properties of the Pd–H system 30
Interface structure
electrochemical impedance spectroscopy study of Ni/MH batteries 814
Intermediate hydride phase
effect of substitution on hysteresis in some high-pressure AB_2 and AB_5 metal hydrides 67
Intermetallic alloys
influence of cobalt content in $MmNi_{4.3-x}Mn_{0.3}Al_{0.4}Co_x$ alloy (x= 0.36 and 0.69) on its electrochemical behaviour studied by in situ neutron diffraction 637
Intermetallic Compound(s)
calorimetric investigation of the hydrogen interaction with $ZrCrFe_{1.2}$ 34
study on the hydrogen solubility in UNiAl 52
a panoramic overview of hydrogen storage alloys from a gas reaction point of view 877
Intermetallic hydrides
pseudobinary intermetallic compounds in Hf_2M'–Hf_2M'' (M′, M″= Mn, Fe, Ni, Cu) systems and their interaction with hydrogen at high pressures 426
Intermetallics
hydrogen absorption properties of amorphous and crystalline alloys in the pseudobinary ZrCo–TiNi system 526
Internal oxidation
some microstructural aspects of hydriding internally oxidized Pd–Al alloys 306
Internal pressure
hot alkaline treatment on hydrogen storage alloys in sealed Ni/MH batteries 809
IQENS
Monte Carlo simulation of hydrogen diffusion in C15 Laves phase intermetallic compounds 296
Iron
hydrogen ordering and H-induced phase transformations in Zr-based intermetallic hydrides 74
Iron aluminide
determination of hydrogen diffusivity by subscale microhardness profiling 279
Irradiation
influence of neutron irradiation on H diffusion in Zr–2.5Nb alloy 324
Isotherm
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 5: H capacity 57
Isothermal kinetic diagram
kinetics and morphology of the reverse β→α hydride transformation in thermodynamically open Pd–H system 379
Isotope
absorption of hydrogen isotopes by Pd–Pt alloys 900
Isotope effect
isotope effects on the physicochemical properties of zirconium hydride 908

Kieselguhr
tritium aging effects in palladium on kieselguhr 62
Kinetics
improvement of activation stage of $MmNi_{4.7}Al_{0.3}$ hydride-forming alloys by surface fluorination 374
evaluation of kinetics by utilizing the normalized pressure dependence method for the alloy $Ti_{0.95}Zr_{0.05}Mn_{1.48}V_{0.43}Fe_{0.08}Al_{0.01}$ 385
hydrogen absorption and desorption by Ti, Ti-5Cr and Ti-5Ni alloys 412
structural study and hydrogen sorption kinetics of ball-milled magnesium hydride 495
the improvement of the hydrogenation properties of nickel-metal hydride battery alloy by surface modification with platinum group metals (PGMs) 613
about the mechanism and the rate limiting step of the metalhydride electrode reaction 663
development of fast kinetics metal hydride alloys and battery electrodes for high power applications 734

$LaCo_5H_x$
magnetic properties of intermetallic compound hydrides and deuterides 243
$LaCo_5H_x$
electromotive force of metal hydride electrodes in gradient magnetic fields 251
$LaNi_5$
microstructures and defect structures in intermetallic compounds in the La–Ni alloy system 140
chemical bond state and hydride stability of hydrogen storage alloys 227
magnetic properties of commercial metal hydride battery materials 255
effect of LiOH pretreatment on H_2 absorption kinetics of $LaNi_5$ 369
improvement of activation stage of $MmNi_{4.7}Al_{0.3}$ hydride-forming alloys by surface fluorination 374
properties of $Zr_{0.5}Ti_{0.5}V_{0.75}Ni_{1.25}$ alloy ball-milled with nanocrystalline $LaNi_5$ powder 712
$LaNi_{4.5}Al_{0.5}$
hydrogen desorption kinetics of hydrides of $LaNi_{4.5}Al_{0.5}$, $LaNi_{4.5}Mn_{0.5}$ and $LaNi_{2.5}Co_{2.5}$ 407
La–Ni alloy
protium diffusion in La–Ni alloys 270
$LaNi_{2.5}Co_{2.5}$
hydrogen desorption kinetics of hydrides of $LaNi_{4.5}Al_{0.5}$, $LaNi_{4.5}Mn_{0.5}$ and $LaNi_{2.5}Co_{2.5}$ 407
effect of alakaline pretreatments (KOH, NaOH, LiOH) on electrochemical hydriding rate and work function of $LaNi_{2.5}Co_{2.5}$ 751
$La(NiM)_5$ hydrides
electronic structure and stability of hydrides of intermetallic compounds 190
$LaNi_5$ melt-spun ribbons
crystal structure and protium absorption properties of La-rich $La(Ni, M)_x$ (x=3–4.7) (M=Al, Co, Mn, Si) melt-spun ribbons 130

$LaNi_{4.5}Mn_{0.5}$
hydrogen desorption kinetics of hydrides of $LaNi_{4.5}Al_{0.5}$, $LaNi_{4.5}Mn_{0.5}$ and $LaNi_{2.5}Co_{2.5}$ 407
Lanthanum
the effect of O_2 preadsorption on the rate of H_2 absorption on the surface of rare earths (La, Ce, Tb, Dy) at 298 K 403
Lanthanum hydride
structural ordering and dynamics of $LaH_{3-\varepsilon}$ 113
La-rich $CaCu_5$-type phase
crystal structure and protium absorption properties of La-rich $La(Ni, M)_x$ (x=3–4.7) (M=Al, Co, Mn, Si) melt-spun ribbons 130
Lattice constant
thermal and mechanical properties of zirconium hydride 23
isotope effects on the physicochemical properties of zirconium hydride 908
Lattice distortion
enhancement of hydrogen solubility in α-iron by coherent precipitates 443
Laves phase(s)
structural studies of Laves phases $ZrCo(V_{1-x}Cr_x)$ with $0 \leqslant x \leqslant 1$ and their hydrides 88
structure study on rapidly solidified hydrogen storage alloy $Zr(NiM)_{2.1}$ 107
Monte Carlo simulation of hydrogen diffusion in C15 Laves phase intermetallic compounds 296
quasi-elastic neutron scattering study of the hydrogen diffusion in the C15 Laves structure, $TiCr_{1.85}$ 351
hydrogen extraction by Laves phase alloys in an alkaline solution containing hydrazine 698
performance of an AB_2 alloy in sealed Ni–MH batteries for electric vehicles: quantification of corrosion rate and consequences on the battery performance 770
C14 Laves phase
new V-based alloys with high protium absorption and desorption capacity 433
C-15 Laves phase compounds
a Born-Mayer approach to the hydrogen potential in C-15 Laves phase compounds 300
Laves phase alloy
electrochemical properties and characteristics of the fluorinated $Zr_{0.9}Ti_{0.1}V_{0.2}Mn_{0.6}Ni_{1.3}La_{0.05}$ electrode 707
Laves phase $(Hf,Ti)(Ni,V)_2$
neutron diffraction study of the new hexagonal laves phase $(Hf,Ti)(Ni,V)_2$ and its deuteride 169
Limitation of solid solution of $CaCu_5$
crystal structure and protium absorption properties of La-rich $La(Ni, M)_x$ (x=3–4.7) (M=Al, Co, Mn, Si) melt-spun ribbons 130
LiOH
effect of LiOH pretreatment on H_2 absorption kinetics of $LaNi_5$ 369
Li–Pd alloys
effect of the penetration of Li atoms into the Pd surface on thermodynamic properties of the Pd–H system 30
Low temperature
migration of hydrogen in yttrium at low temperatures 341

Magnesium
hydrogen permeation through magnesium 329
catalysed reactive milling 400
in situ study of hydriding–dehydriding properties in some Pd/Mg thin films with different degree of Mg crystallization 484
Magnesium composites
hydrogen-absorbing magnesium composites prepared by mechanical grinding with graphite: effects of additives on composite structures and hydriding properties 564
Magnesium hydride
structural study and hydrogen sorption kinetics of ball-milled magnesium hydride 495
Magnesium impurity
effects of the amount of Mg impurity on the electrochemical properties of $Ml(NiCoMnTi)_5$ hydrogen storage alloy 684
Magnesium–nickel
hydriding properties of the MgNi-based systems 437
Magnetic anisotropy
hydrogen ion implantation effect on the magnetic properties of metallic multilayered films 463
Magnetic field effects
electromotive force of metal hydride electrodes in gradient magnetic fields 251
Magnetism
the influence of hydrogen on the magnetic properties and electronic structures of intermetallic compounds: YFe_2–D_2 system as an example 237
magnetic properties of commercial metal hydride battery materials 255
Mathematical model
two mathematical models for the hydrogen storage properties of AB_2 type alloys 10
Mechanical alloying
the effect of novel processing on hydrogen uptake in FeTi- and magnesium-based alloys 458
structural investigation and solid-H_2 reaction of Mg_2Ni rich nanocomposite materials elaborated by mechanical alloying 501
microstructure and hydrogen absorption properties of nano-phase composite prepared by mechanical alloying of $MmNi_{5-x}(CoAlMn)_x$ and Mg 531
synthesis and hydriding/dehydriding properties of amorphous $Mg_2Ni_{1.9}M_{0.1}$ alloys mechanically alloyed from $Mg_2Ni_{0.9}M_{0.1}$ (M=none, Ni, Ca, La, Y, Al, Si, Cu and Mn) and Ni powder 541
hydriding properties of the heat-treated MgNi alloys with nanostructural designed multiphase 546
electrochemical characteristics of nanocrystalline $ZrCr_2$ and Mg_2Ni type metal hydrides prepared by mechanical alloying 556
Mechanical grinding
structural studies of disordered Mg_2NiH_4 formed by mechanical grinding 146
hydrogen-absorbing magnesium composites prepared by mechanical grinding with graphite: effects of additives on composite structures and hydriding properties 564
electrochemical properties of mechanically ground Mg_2Ni alloy 643
Melt-quenching effects
crystal structure and protium absorption properties of La-rich $La(Ni, M)_x$ (x=3–4.7) (M=Al, Co, Mn, Si) melt-spun ribbons 130
Melt spinning
improvement of hydrogen storage properties of melt-spun Mg–Ni–RE alloys by nanocrystallization 521
electrochemical performance of Sn-substituted, $LaNi_5$-based rapidly solidified alloys 724
Melt spinning method
effect of rapid solidification process on the alloy structure and electrode performance of $Zr(Ni_{0.55}V_{0.1}Mn_{0.3}Cr_{0.55})_{2.1}$ 756
Melt-spun
comparison of the electrochemical properties of cast and melt-spun $MLNi_{4.3-x}Co_xMn_{0.4}Al_{0.3}$ (ML: La-rich Mischmetal) hydrogen-storage alloys 742
Membrane
hydrogen permeation through magnesium 329

Mesoscopic grains
tensile and impact properties of mesoscopic-grained α+β-type titanium alloys obtained through hydrogen treatments 858
Metal
a BPP model for nuclear spin relaxation in disordered metal–hydrogen systems 260
Metal hydride(s)
electromotive force of metal hydride electrodes in gradient magnetic fields 251
magnetic properties of commercial metal hydride battery materials 255
coherency stresses and deuterium diffusion in $NbD_{0.33}$ 289
evaluation of kinetics by utilizing the normalized pressure dependence method for the alloy $Ti_{0.95}Zr_{0.05}Mn_{1.48}V_{0.43}Fe_{0.08}Al_{0.01}$ 385
silica embedded metal hydrides 446
the effect of annealing on the discharge characteristics of $ZrV_{0.7}Mn_{0.5}Ni_{1.2}$ alloy 601
about the mechanism and the rate limiting step of the metalhydride electrode reaction 663
recent developments in hydrogen storage applications based on metal hydrides 889
a multi-hydride thermal wave device for simultaneous heating and cooling 915
Metal hydride battery
development of fast kinetics metal hydride alloys and battery electrodes for high power applications 734
Metal hydride electrode(s)
the correlation between composition and electrochemical properties of metal hydride electrodes 569
modification of a rapidly solidified hydrogen storage electrode alloy by ball-milling with Co_3Mo 670
electrochemical performance of Sn-substituted, $LaNi_5$-based rapidly solidified alloys 724
effects of pretreatments on the electrochemical properties of $MlNi_{4.0}Co_{0.6}Al_{0.4}$ alloy electrode and the performance of a Ni/Metal hydride battery 728
in-situ and ex-situ characterization of surface oxide films on AB_5-type metal hydride electrodes 747
Metal hydride materials
R&D on metal hydride materials and Ni–MH batteries in Japan 762
Metal hydrogen
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 5: H capacity 57
neutron diffraction study of the $LaNi_5$–D system during activation 118
observation of a continuous phase transformation in $LaNi_5$–D 135
Metal hydrogen systems
structural studies of Laves phases $ZrCo(V_{1-x}Cr_x)$ with $0 \leqslant x \leqslant 1$ and their hydrides 88
Metallic multilayer
hydrogen ion implantation effect on the magnetic properties of metallic multilayered films 463
Metallurgical microstructure and crystal-structure
advanced nanocrystalline Zr-based AB_2 hydrogen storage electrode materials for NiMH EV batteries 508
Metamagnetic transition
magnetic properties of intermetallic compound hydrides and deuterides 243
Mg_2Ni
chemical bond state and hydride stability of hydrogen storage alloys 227
charge and discharge characteristics of sintered Mg_2Ni 626
electrochemical properties of mechanically ground Mg_2Ni alloy 643
MgNi alloy
Mg_2Ni hydride electrodes prepared by sintering and subsequent ball milling with Ni powders 536
synthesis and hydriding/dehydriding properties of amorphous $Mg_2Ni_{1.9}M_{0.1}$ alloys mechanically alloyed from $Mg_2Ni_{0.9}M_{0.1}$ (M=none, Ni, Ca, La, Y, Al, Si, Cu and Mn) and Ni powder 541
$MgNi_x$ alloy
electrochemical and structural characteristics of amorphous $MgNi_x$ ($x \geq 1$) alloys prepared by mechanical alloying 552
a new electrode material for nickel–metal hydride batteries: MgNi–graphite composites prepared by ball-milling 653
Mg_2Ni-based hydrogen storage alloys
Mg_2Ni-based hydrogen storage alloys for metal hydride electrodes 675
MgNi–graphite composite
a new electrode material for nickel–metal hydride batteries: MgNi–graphite composites prepared by ball-milling 653
Mg–Ni nanocomposite materials
structural investigation and solid-H_2 reaction of Mg_2Ni rich nanocomposite materials elaborated by mechanical alloying 501
Mg–Ni–RE alloys
improvement of hydrogen storage properties of melt-spun Mg–Ni–RE alloys by nanocrystallization 521
MH Electrode
effects of cooling rate during casting on performance of metal hydride electrodes and nickel–metal hydride batteries 608
electrochemical characteristics of AB_5-type hydrogen storage alloys solidified at different cooling rates 621
MH/Ni batteries
the correlation between composition and electrochemical properties of metal hydride electrodes 569
degradation mechanism of the misch metal alloy hydride electrodes 737
Microcrystalline C14 Laves phase
effect of rapid solidification process on the alloy structure and electrode performance of $Zr(Ni_{0.55}V_{0.1}Mn_{0.3}Cr_{0.55})_{2.1}$ 756
Microhardness profiling
determination of hydrogen diffusivity by subscale microhardness profiling 279
Microstructure
protium diffusion in La–Ni alloys 270
some microstructural aspects of hydriding internally oxidized Pd–Al alloys 306
hydrogen surface effects in ferritic stainless steels 356
influence of carbon on electrode properties of V–Ti–Ni type hydrogen storage alloy 716
Misch metal alloy
degradation mechanism of the misch metal alloy hydride electrodes 737
Miscibility-gap
hydriding properties of the MgNi-based systems 437
$MmNi_5$–Mg composite
microstructure and hydrogen absorption properties of nano-phase composite prepared by mechanical alloying of $MmNi_{5-x}(CoAlMn)_x$ and Mg 531
Modeling
calculation of the radial distribution function of bubbles in the aluminum hydrogen system 231
Molecular orbital method
roles of the hydride forming and non-forming elements in hydrogen storage alloys 222
Monte-Carlo
Monte Carlo simulation of hydrogen diffusion in C15 Laves phase intermetallic compounds 296

Multi-layer problems
multi-layer problems in time-lag measurements applied on metal–hydrogen systems 282
Multi-phase alloy
new V-based alloys with high protium absorption and desorption capacity 433
Muon
muon diffusion in metallic hydride systems 292

Nanocrystalline
electrochemical characteristics of nanocrystalline $ZrCr_2$ and Mg_2Ni type metal hydrides prepared by mechanical alloying 556
properties of $Zr_{0.5}Ti_{0.5}V_{0.75}Ni_{1.25}$ alloy ball-milled with nanocrystalline $LaNi_5$ powder 712
Nanocrystalline alloys
microstructure and hydrogen absorption properties of nano-phase composite prepared by mechanical alloying of $MmNi_{3.5}(CoAlMn)_{1.5}$ and Mg 531
Nanocrystalline electrode materials
advanced nanocrystalline Zr-based AB_2 hydrogen storage electrode materials for NiMH EV batteries 508
Nanocrystalline materials
structural study and hydrogen sorption kinetics of ball-milled magnesium hydride 495
Nanocrystallization
improvement of hydrogen storage properties of melt-spun Mg–Ni–RE alloys by nanocrystallization 521
Nanoscaled multiphase
hydriding properties of the heat-treated MgNi alloys with nanostructural designed multiphase 546
Nb
hydrogen in thin epitaxial Nb films 476
Nb-film
hydrogen in thin epitaxial Nb films 476
Nd–Fe–B
effect of the disproportionation and recombination stages of the HDDR process on the inducement of anisotropy in Nd–Fe–B magnets 862
Ga site occupancy in HDDR-treated $Nd_2Fe_{14}B$-based alloy by XAFS 872
Neutron diffraction
structural studies of Laves phases $ZrCo(V_{1-x}Cr_x)$ with $0 \leq x \leq 1$ and their hydrides 88
structural ordering and dynamics of $LaH_{3-\varepsilon}$ 113
neutron diffraction study of the $LaNi_5$–D system during activation 118
crystallographic study of $LaNi_{5-x}Sn_x$ ($0.2 \leq x \leq 0.5$) compounds and their hydrides 124
observation of a continuous phase transformation in $LaNi_5$–D 135
neutron diffraction study of the new hexagonal laves phase $(Hf,Ti)(Ni,V)_2$ and its deuteride 169
crystal and magnetic structure of TbNiAl-based deuterides, $TbNiAlD_{0.30}$ and $TbNiAlD_{1.04}$, studied by neutron diffraction and synchrotron radiation 178
influence of cobalt content in $MmNi_{4.3-x}Mn_{0.3}Al_{0.4}Co_x$ alloy (x= 0.36 and 0.69) on its electrochemical behaviour studied by in situ neutron diffraction 637
Neutron spectroscopy
coherency stresses and deuterium diffusion in $NbD_{0.33}$ 289
Nickel
in situ measurement of lattice parameter change on Pd and Ni during cathodic hydrogen charging 174
catalysed reactive milling 400
Nickel–metal hydride batteries
effects of cooling rate during casting on performance of metal hydride electrodes and nickel–metal hydride batteries 608
electrochemical characteristics of AB_5-type hydrogen storage alloys solidified at different cooling rates 621
Nickel/metal hydride battery
a new electrode material for nickel–metal hydride batteries: MgNi–graphite composites prepared by ball-milling 653
electrochemical impedance spectroscopy study of Ni/MH batteries 814
Ni–MH batteries
modification of a rapidly solidified hydrogen storage electrode alloy by ball-milling with Co_3Mo 670
a study of the main factors affecting Ni–MH battery activation 799
Ni/MH battery
electrochemical and structural characteristics of amorphous $MgNi_x$ ($x \geq 1$) alloys prepared by mechanical alloying 552
effect of advanced alkaline treatment on the electrochemical characteristics of hydrogen storage alloys 687
effects of pretreatments on the electrochemical properties of $MlNi_{4.0}Co_{0.6}Al_{0.4}$ alloy electrode and the performance of a Ni/Metal hydride battery 728
R&D on metal hydride materials and Ni–MH batteries in Japan 762
performance of an AB_2 alloy in sealed Ni–MH batteries for electric vehicles: quantification of corrosion rate and consequences on the battery performance 770
preparation and properties of no-binder electrode Ni/MH battery 780
study of preparation technology for high performance AA size Ni–MH batteries 784
effect of state of charge on impedance spectrum of sealed Ni–MH cells 788
characteristics of Ni/MH power batteries and its application to electric vehicles 804
hot alkaline treatment on hydrogen storage alloys in sealed Ni/MH batteries 809
influence of Ce and Nd contents of $Ml(NiCoMnAl)_5$ alloy on the performances of Ni–MH batteries 821
effect of cobalt powder on the inner pressure of Ni/MH batteries 825
effect of Co additives on the cycle life of Ni–MH batteries 829
Ni–MH Electrode
Mg_2Ni hydride electrodes prepared by sintering and subsequent ball milling with Ni powders 536
Niobium
influence of interstitial oxygen on hydrogen solubility in metals 42
Nitride
the synthesis and magnetic properties of $LaCo_{13}$ hydrides and nitrides 247
Nitrided alloys
enhancement of hydrogen solubility in α-iron by coherent precipitates 443
No-binder electrode
preparation and properties of no-binder electrode Ni/MH battery 780
Nuclear spin relaxation
a BPP model for nuclear spin relaxation in disordered metal–hydrogen systems 260
Numerical simulations
multi-layer problems in time-lag measurements applied on metal–hydrogen systems 282

Optical microscopy in situ
kinetics and morphology of the reverse β→α hydride transformation in thermodynamically open Pd–H system 379

Order–disorder
migration of hydrogen in yttrium at low temperatures 341
Over-stoichiometry
a review on the development of AB_2-type Zr-based Laves phase hydrogen storage alloys for Ni–MH rechargeable batteries in the Korea Advanced Institute of Science and Technology 583
Oxidation
effect of LiOH pretreatment on H_2 absorption kinetics of $LaNi_5$ 369
Oxide
hydrogen dissolution into zirconium oxide 38
Oxygen
influence of interstitial oxygen on hydrogen solubility in metals 42

P–C isotherms
effect of Mo additive on hydrogen absorption of rare-earth based hydrogen storage alloy 721
p–C–T relationship
hydrogen absorption and desorption by Ti, Ti-5Cr and Ti-5Ni alloys 412
Palladium
thermodynamic properties of hydrogen in fine Pd powders 19
tritium aging effects in palladium on kieselguhr 62
in situ measurement of lattice parameter change on Pd and Ni during cathodic hydrogen charging 174
kinetics and morphology of the reverse β→α hydride transformation in thermodynamically open Pd–H system 379
pd-cluster size effects of the hydrogen sorption properties 472
hydrogen sorption in elastically soft stabilized Pd-clusters 480
in situ study of hydriding–dehydriding properties in some Pd/Mg thin films with different degree of Mg crystallization 484
PCT curve(s)
two mathematical models for the hydrogen storage properties of AB_2 type alloys 10
hydrogen absorption properties of amorphous and crystalline alloys in the pseudobinary ZrCo–TiNi system 526
hydrogen absorption and desorption properties of Hf-based intermetallic compounds 417
Pd
in situ monitoring of hydrogen absorption–desorption in Pd and $Pd_{77}Ag_{23}$ films by an electrochemical quartz crystal microbalance 468
electrochemical properties of mechanically ground Mg_2Ni alloy 643
$Pd_{77}Ag_{23}$
in situ monitoring of hydrogen absorption–desorption in Pd and $Pd_{77}Ag_{23}$ films by an electrochemical quartz crystal microbalance 468
Pd/Fe alloys
hydrogen solution in homogeneous Pd–Fe alloys 1
Pd hydride
effect of the penetration of Li atoms into the Pd surface on thermodynamic properties of the Pd–H system 30
Pd–Pt alloy
absorption of hydrogen isotopes by Pd–Pt alloys 900
Pd-rich alloys
hydrogen-induced rearrangements in Pd-rich alloys 161
Penetration of Li into Pd
effect of the penetration of Li atoms into the Pd surface on thermodynamic properties of the Pd–H system 30
Permeation
hydrogen permeation through magnesium 329
Permanent magnetic properties
phase transformation and magnetic properties of $Nd_8Fe_{84}Ti_8$ alloy during HDDR process 868
Perpendicular magnetization
hydrogen ion implantation effect on the magnetic properties of metallic multilayered films 463
Phase stability
chemical bond state and hydride stability of hydrogen storage alloys 227
Phase structure
influences of annealing heat treatment on phase structure and electrochemical properties of $Zr(MnVNi)_2$ hydrogen storage alloys 691
Phase transformation
TEM investigation of ZrO_2 in $Zr(Ni_{0.55}V_xMn_{0.45-x})_2$ hydrogen storage alloys 101
observation of a continuous phase transformation in $LaNi_5$–D 135
the intrinsic degradation behavior of $(V_{0.53}Ti_{0.47})_{0.925}Fe_{0.075}$ alloy during temperature-induced hydrogen absorption-desorption cycling 150
phase transformation and magnetic properties of $Nd_8Fe_{84}Ti_8$ alloy during HDDR process 868
Phase transformation stress
degradation behavior of foamed nickel positive electrodes of Ni–MH batteries 795
Physical vapour deposition
the effect of novel processing on hydrogen uptake in FeTi- and magnesium-based alloys 458
Plateau region
the intrinsic degradation behavior of $(V_{0.53}Ti_{0.47})_{0.925}Fe_{0.075}$ alloy during temperature-induced hydrogen absorption-desorption cycling 150
Platinum group metals
the improvement of the hydrogenation properties of nickel-metal hydride battery alloy by surface modification with platinum group metals (PGMs) 613
Point defects
dynamics of hydrogen in scandium and yttrium by acoustic spectroscopy 334
Polytype
microstructures and defect structures in intermetallic compounds in the La–Ni alloy system 140
Porous
silica embedded metal hydrides 446
Positive electrode
preparation of an improved positive electrode and its application in Ni/MH batteries 775
Positive electrode improvement
preparation of an improved positive electrode and its application in Ni/MH batteries 775
Powder
thermodynamic properties of hydrogen in fine Pd powders 19
Powder neutron diffraction
hydrogen ordering and H-induced phase transformations in Zr-based intermetallic hydrides 74
hydrogenation behaviour, neutron diffraction studies and microstructural characterisation of boron oxide-doped Zr–V alloys 93
Power battery
characteristics of Ni/MH power batteries and its application to electric vehicles 804
Preparation technology
study of preparation technology for high performance AA size Ni–MH batteries 784
Pressure–composition isotherm
improvement of hydrogen storage properties of melt-spun Mg–Ni–RE alloys by nanocrystallization 521
Pressure-composition-temperature isotherms
phase composition and the effect of thermal cycling for VH_x, $V_{0.995}C_{0.005}H_x$ and $V_{0.975}Zr_{0.020}C_{0.005}H_x$ 156

Pressure dependence
evaluation of kinetics by utilizing the normalized pressure dependence method for the alloy $Ti_{0.95}Zr_{0.05}Mn_{1.48}V_{0.43}Fe_{0.08}Al_{0.01}$ 385
Pretreatment
charge and discharge characteristics of sintered Mg_2Ni 626
influence of concentration of KOH solution containing 0.02 M borohydride on the kinetic properties of hydrogen storage alloys 680
Protium
protium diffusion in La–Ni alloys 270
tensile and impact properties of mesoscopic-grained $\alpha+\beta$-type titanium alloys obtained through hydrogen treatments 858
Proton conducting oxide electrolyte
hydrogen transport between proton conducting oxide and hydrogen storage metal 838

Quasielastic neutron scattering
structural ordering and dynamics of $LaH_{3-\delta}$ 113
local and long-range hydrogen diffusion in $Nb(OH)_{0.011}$ 275
quasi-elastic neutron scattering study of the hydrogen diffusion in the C15 Laves structure, $TiCr_{1.85}$ 351

Radiation-like damage
hydrogen surface effects in ferritic stainless steels 356
Raman
a new electrode material for nickel–metal hydride batteries: MgNi–graphite composites prepared by ball-milling 653
Rapidly solidified hydrogen storage alloys
structure study on rapidly solidified hydrogen storage alloy $Zr(NiM)_{2.1}$ 107
Rare earth based hydrogen storage alloys
segregation control for the preparation of rare earth based hydrogen storage alloys 658
Rare earth hydrides
the effect of O_2 preadsorption on the rate of H_2 absorption on the surface of rare earths (La, Ce, Tb, Dy) at 298 K 403
Rare-earth intermetallic compound
crystal and magnetic structure of TbNiAl-based deuterides, $TbNiAlD_{0.30}$ and $TbNiAlD_{1.04}$, studied by neutron diffraction and synchrotron radiation 178
Rare earth intermetallic compounds
electrochemical performance of Sn-substituted, $LaNi_5$-based rapidly solidified alloys 724
Rare earth metal alloying
contribution of rare-earths to activation property of Zr-based hydride electrodes 632
Rate capability
a review on the development of AB_2-type Zr-based Laves phase hydrogen storage alloys for Ni–MH rechargeable batteries in the Korea Advanced Institute of Science and Technology 583
the effect of annealing on the discharge characteristics of $ZrV_{0.7}Mn_{0.5}Ni_{1.2}$ alloy 601
improvement of the electrochemical properties of Zr-based AB_2 alloys by an advanced fluorination technique 702
Rate capacity
electrochemical properties and characteristics of a fluorinated AB_2-alloy 593
Reaction resistance
about the mechanism and the rate limiting step of the metalhydride electrode reaction 663
Reaction surface area
a review on the development of AB_2-type Zr-based Laves phase hydrogen storage alloys for Ni–MH rechargeable batteries in the Korea Advanced Institute of Science and Technology 583
Rearrangements
hydrogen-induced rearrangements in Pd-rich alloys 161
RE-based hydrogen storage alloy
effect of Mo additive on hydrogen absorption of rare-earth based hydrogen storage alloy 721
Recombination
effect of the disproportionation and recombination stages of the HDDR process on the inducement of anisotropy in Nd–Fe–B magnets 862
Refrigeration
a multi-hydride thermal wave device for simultaneous heating and cooling 915
Reverse hydride transformation
kinetics and morphology of the reverse $\beta\rightarrow\alpha$ hydride transformation in thermodynamically open Pd–H system 379
Reversible hydrogen storage capacity
the effect of annealing on the discharge characteristics of $ZrV_{0.7}Mn_{0.5}Ni_{1.2}$ alloy 601
Review
R&D on metal hydride materials and Ni–MH batteries in Japan 762
a panoramic overview of hydrogen storage alloys from a gas reaction point of view 877
Rietveld analysis
structure study on rapidly solidified hydrogen storage alloy $Zr(NiM)_{2.1}$ 107

SANS
calculation of the radial distribution function of bubbles in the aluminum hydrogen system 231
Saturation magnetization
the synthesis and magnetic properties of $LaCo_{13}$ hydrides and nitrides 247
Scanning electron microscopy
phase composition and the effect of thermal cycling for VH_x, $V_{0.995}C_{0.005}H_x$, and $V_{0.975}Zr_{0.020}C_{0.005}H_x$ 156
some microstructural aspects of hydriding internally oxidized Pd–Al alloys 306
Scanning probe microscopy
a new method for two-dimensional hydrogen analysis and its application to metal surfaces 361
Segregation control
segregation control for the preparation of rare earth based hydrogen storage alloys 658
Semiconductors
local dynamics of H and D trapped by substitutional dopants in semiconductors 396
Separation
absorption of hydrogen isotopes by Pd–Pt alloys 900
SHS
the structural peculiarities of the transition metals carbohydrides produced by combustion synthesis 452
Silica
tritium aging effects in palladium on kieselguhr 62
Silica composite
silica embedded metal hydrides 446
SIMS
chemical structure and bonding characteristics of metal hydrogen systems studied by the surface analytical techniques SIMS and XPS 202
Single crystal diffraction
crystallographic study of $LaNi_{5-x}Sn_x$ ($0.2\leq x\leq 0.5$) compounds and their hydrides 124
Site occupancy
Ga site occupancy in HDDR-treated $Nd_2Fe_{14}B$-based alloy by XAFS 872

Small angle neutron scattering
the use of small angle neutron scattering in the study of hydrogen trapping at defects in metals 346
Sn
crystallographic study of $LaNi_{5-x}Sn_x$ ($0.2 \le x \le 0.5$) compounds and their hydrides 124
Solid solution
the structural peculiarities of the transition metals carbohydrides produced by combustion synthesis 452
Solid sorption
a multi-hydride thermal wave device for simultaneous heating and cooling 915
Solubility
solubility and partitioning of hydrogen in metastable Zr-based alloys used in the nuclear industry 893
Specific surface area
a duplicated fluorination technique for hydrogen storage alloys 364
electrochemical properties and characteristics of a fluorinated AB_2-alloy 593
Spherical metallic Ni
a duplicated fluorination technique for hydrogen storage alloys 364
Spin-off quenching
segregation control for the preparation of rare earth based hydrogen storage alloys 658
Spontaneous reaction synthesis
segregation control for the preparation of rare earth based hydrogen storage alloys 658
Sputtering
in situ study of hydriding–dehydriding properties in some Pd/Mg thin films with different degree of Mg crystallization 484
Stability of hydrides
electronic structure and stability of hydrides of intermetallic compounds 190
Stacking fault
microstructures and defect structures in intermetallic compounds in the La–Ni alloy system 140
Statistical-thermodynamics
high-pressure studies of Laves phase intermetallic hydrides–Adaptation of statistical thermodynamic models 14
Strain
neutron diffraction study of the $LaNi_5$–D system during activation 118
hydrogen-induced stress in Nb single layers 490
Stress
in situ monitoring of hydrogen absorption–desorption in Pd and $Pd_{77}Ag_{23}$ films by an electrochemical quartz crystal microbalance 468
hydrogen-induced stress in Nb single layers 490
Structural study
structural studies of disordered Mg_2NiH_4 formed by mechanical grinding 146
Substitution
systematic B-metal substitution in $CaNi_5$ 185
hydriding properties of the MgNi-based systems 437
synthesis and hydriding/dehydriding properties of amorphous $Mg_2Ni_{1-y}M_y$ alloys mechanically alloyed from $Mg_2Ni_{0.9}M_{0.1}$ (M=none, Ni, Ca, La, Y, Al, Si, Cu and Mn) and Ni powder 541
Substitutional elements effects
crystal structure and protium absorption properties of La-rich La(Ni, M)$_x$ (x=3–4.7) (M=Al, Co, Mn, Si) melt-spun ribbons 130
Substitution by Mo
effect of Mo additive on hydrogen absorption of rare-earth based hydrogen storage alloy 721
Superalloy
a visible technology for display of hydrogen distribution in metals 317
Surface

characteristics of hydrogen storage alloys 687
Surface effects
hydrogen surface effects in ferritic stainless steels 356
Surface oxide film
in-situ and ex-situ characterization of surface oxide films on AB_5-type metal hydride electrodes 747
Surface properties
in-situ and ex-situ characterization of surface oxide films on AB_5-type metal hydride electrodes 747
Surface structure
electrochemical Properties and Characteristics of the Fluorinated $Zr_{0.9}Ti_{0.1}V_{0.2}Mn_{0.6}Ni_{1.3}La_{0.05}$ electrode 707
Surface treatment
improvement of the electrochemical properties of Zr-based AB_2 alloys by an advanced fluorination technique 702
electrochemical impedance spectroscopy study of Ni/MH batteries 814
Synchrotron radiation
crystal and magnetic structure of TbNiAl-based deuterides, $TbNiAlD_{0.30}$ and $TbNiAlD_{1.04}$, studied by neutron diffraction and synchrotron radiation 178

Tantalum
influence of interstitial oxygen on hydrogen solubility in metals 42
Tensile properties
tensile and impact properties of mesoscopic-grained $\alpha+\beta$-type titanium alloys obtained through hydrogen treatments 858
Terbium
the effect of O_2 preadsorption on the rate of H_2 absorption on the surface of rare earths (La, Ce, Tb, Dy) at 298 K 403
Thermal analysis
the effect of novel processing on hydrogen uptake in FeTi- and magnesium-based alloys 458
Thermal cycling
the intrinsic degradation behavior of $(V_{0.53}Ti_{0.47})_{0.925}Fe_{0.075}$ alloy during temperature-induced hydrogen absorption-desorption cycling 150
Thermal desorption
hydrogen dissolution into zirconium oxide 38
Thermal expansion coefficient
thermal and mechanical properties of zirconium hydride 23
isotope effects on the physicochemical properties of zirconium hydride 908
Thermodynamic properties
thermodynamic properties of hydrogen in fine Pd powders 19
study on the hydrogen solubility in UNiAl 52
Thermodynamics
hydrogen solution in homogeneous Pd–Fe alloys 1
high-pressure studies of Laves phase intermetallic hydrides–Adaptation of statistical thermodynamic models 14
Thin epitaxial film
hydrogen in thin epitaxial Nb films 476
Thin film
in situ monitoring of hydrogen absorption–desorption in Pd and $Pd_{77}Ag_{23}$ films by an electrochemical quartz crystal microbalance 468
in situ study of hydriding–dehydriding properties in some Pd/Mg thin films with different degree of Mg crystallization 484
hydrogen-induced stress in Nb single layers 490
TiCo
electronic structure and hydriding property of titanium compounds with CsCl-type structure 213

$TiCr_{1.8}$
high-pressure studies of Laves phase intermetallic hydrides–Adaptation of statistical thermodynamic models 14
TiFe
electronic structure and hydriding property of titanium compounds with CsCl-type structure 213
chemical bond state and hydride stability of hydrogen storage alloys 227
Time-lag techniques
multi-layer problems in time-lag measurements applied on metal–hydrogen systems 282
Time-of-flight mass spectroscopy
a new method for two-dimensional hydrogen analysis and its application to metal surfaces 361
TiNi
electronic structure and hydriding property of titanium compounds with CsCl-type structure 213
Titanium
influence of interstitial oxygen on hydrogen solubility in metals 42
Titanium alloy
hydrogen absorption and desorption by Ti, Ti-5Cr and Ti-5Ni alloys 412
Transmission electron microscopy
microstructures and defect structures in intermetallic compounds in the La–Ni alloy system 140
hydriding properties of the heat-treated MgNi alloys with nanostructural designed multiphase 546
Trapping
stability of the hydrogen absorption and desorption plateaux in $LaNi_5$–H. Part 5: H capacity 57
H and D tunnelling systems in diluted $Nb_{1-x}Zr_x$ alloys 338
the use of small angle neutron scattering in the study of hydrogen trapping at defects in metals 346
Treatment
hydrogen extraction by Laves phase alloys in an alkaline solution containing hydrazine 698
Tritium
tritium aging effects in palladium on kieselguhr 62
Tritium autoradiography
a visible technology for display of hydrogen distribution in metals 317
TSS
solubility and partitioning of hydrogen in metastable Zr-based alloys used in the nuclear industry 893

Uranium
study on the hydrogen solubility in UNiAl 52
USANS
calculation of the radial distribution function of bubbles in the aluminum hydrogen system 231

Vacancy
nature of hydrogen trapping sites in steels induced by plastic deformation 310
Vanadium
influence of interstitial oxygen on hydrogen solubility in metals 42
hydrogenation behaviour, neutron diffraction studies and microstructural characterisation of boron oxide-doped Zr–V alloys 93
Vanadium alloys
phase composition and the effect of thermal cycling for VH_x, $V_{0.995}C_{0.005}H_x$, and $V_{0.975}Zr_{0.020}C_{0.005}H_x$ 156
Vanadium-based solid solution alloy
influence of carbon on electrode properties of V–Ti–Ni type hydrogen storage alloy 716
Vanadium hydride
phase composition and the effect of thermal cycling for VH_x, $V_{0.995}C_{0.005}H_x$, and $V_{0.975}Zr_{0.020}C_{0.005}H_x$ 156
V-based alloy
new V-based alloys with high protium absorption and desorption capacity 433
VH_2
chemical bond state and hydride stability of hydrogen storage alloys 227
Vibrational spectroscopy
structural ordering and dynamics of LaH_{2-x} 113
Volume density
synthesis and properties of multicomponent hydrides with high density 421
Volume specific capacity
study of preparation technology for high performance AA size Ni–MH batteries 784

Work function
effect of alakaline pretreatments (KOH, NaOH, LiOH) on electrochemical hydriding rate and work function of $LaNi_{5-x}Co_x$ 751

XAFS
Ga site occupancy in HDDR-treated $Nd_2Fe_{14}B$-based alloy by XAFS 872
XPS
chemical structure and bonding characteristics of metal hydrogen systems studied by the surface analytical techniques SIMS and XPS 202
electrochemical and structural characteristics of amorphous $MgNi_x$ ($x \geq 1$) alloys prepared by mechanical alloying 552
a new electrode material for nickel–metal hydride batteries: MgNi–graphite composites prepared by ball-milling 653
X-ray absorption
the influence of hydrogen on the magnetic properties and electronic structures of intermetallic compounds: YFe_2–D_2 system as an example 237
X-ray Auger
electrochemical and structural characteristics of amorphous $MgNi_x$ ($x \geq 1$) alloys prepared by mechanical alloying 552
X-ray diffraction
phase composition and the effect of thermal cycling for VH_x, $V_{0.995}C_{0.005}H_x$, and $V_{0.975}Zr_{0.020}C_{0.005}H_x$ 156
in situ measurement of lattice parameter change on Pd and Ni during cathodic hydrogen charging 174
X-ray scattering isotherms
hydrogen in thin epitaxial Nb films 476

Yttrium–H alloy
migration of hydrogen in yttrium at low temperatures 341

Zirconia
TEM investigation of ZrO_2 in $Zr(Ni_{0.55}V_xMn_{0.45-x})_2$ hydrogen storage alloys 101
Zirconium
influence of interstitial oxygen on hydrogen solubility in metals 42
hydrogen ordering and H-induced phase transformations in Zr-based intermetallic hydrides 74
hydrogenation behaviour, neutron diffraction studies and microstructural characterisation of boron oxide-doped Zr–V alloys 93
influence of neutron irradiation on H diffusion in Zr–2.5Nb alloy 324
Zirconium deuteride
isotope effects on the physicochemical properties of zirconium hydride 908

Zirconium hydride
thermal and mechanical properties of zirconium hydride 23
Zirconium oxide
hydrogen dissolution into zirconium oxide 38
Zr-based AB_2 hydrogen storage alloys
advanced nanocrystalline Zr-based AB_2 hydrogen storage electrode materials for NiMH EV batteries 508
Zr-based electrode
contribution of rare-earths to activation property of Zr-based hydride electrodes 632
properties of $Zr_{0.5}Ti_{0.5}V_{0.75}Ni_{1.25}$ alloy ball-milled with nanocrystalline $LaNi_5$ powder 712
ZrCo-hydrides
electronic structure and stability of hydrides of intermetallic compounds 190
$ZrCo(V_{1-x}Cr_x)$
structural studies of Laves phases $ZrCo(V_{1-x}Cr_x)$ with $0 \leqslant x \leqslant 1$ and their hydrides 88
$ZrCr_2$ and Mg_2Ni type alloy
electrochemical characteristics of nanocrystalline $ZrCr_2$ and Mg_2Ni type metal hydrides prepared by mechanical alloying 556
$ZrCrFe_{1/2}$ intermetallic compound
calorimetric investigation of the hydrogen interaction with $ZrCrFe_{1/2}$ 34
$ZrMn_2$
chemical bond state and hydride stability of hydrogen storage alloys 227
Zr–Nb alloys
solubility and partitioning of hydrogen in metastable Zr-based alloys used in the nuclear industry 893
ZrNi-hydride
electronic structure and stability of hydrides of intermetallic compounds 190
